

Day 2

Let's continue to build the platform. Below are a couple of additional features:

- Add to cart button
 - The product page will have an add to cart button
 - The product page will have a cart icon on the menu
 - When add to cart button is clicked, there should be a message below the cart icon - Product has been added to cart
- Buy Now button
 - There should be a buy now button below the add to cart button
 - When user clicks on buy now user should be redirected to the thank you page
- Thank you page
 - Shows a thank you message with the item user purchased by clicking Buy Now button
 - Item name, image and quantity and user name should be shown
 - The page should only be accessible after user clicks buy now button
- For anonymous users, add to cart button, buy now button and thank you page should be disabled **or** hidden completely **or** not accessible.
